IFB299 Application Design and Development

Personal Portfolio Brief Description

1. Create Booking

For the "Booking" feature I completed the following tasks:

- Create help request summary page with inputs to inform final booking information[Volunteer]
- Write code to update request detail in database
- Write code to retrieve request detail from database

This part in personal portfolio is attached with source code.

2. DB: Manage Volunteer Account

For the "Manage Volunteer Account" feature I completed the following tasks:

- Create edit detail form (Edit/Delete)
- Write code to update volunteer's detail in database
- Write code to delete volunteer's detail in database

3. Create Volunteer Feedback [Client]

For the "Volunteer Feedback" I completed the following tasks:

- Modify feedback form to include feedback on volunteer
- Write code to insert feedback into database
- Write code to retrieve volunteer's details from the database
- Modify feedback request email to include request for feedback on volunteer.

This part is attached with source code.

4. Test Manage Volunteer Account [Admin]

Manage Volunteer Account function for administrator was tested. A administrator should be able to approval the volunteer account. The he/she should be able to delete a volunteer account either.

This part is attached with test cases in HTML format and a README text file.

5. Test Service Provider Feedback [Client]

"Service Provider Feedback" function was tested. A client should be able to give mark (up to 5) to the service provider. And the rating should be store in the database.
